Start Fresh. Buy New

When you buy a newly built home,
you're free to move in and start living

the life you want.

Unfortunately, that is not case for all homeowners. For those who choose to purchase a used home, the initial excitement is quickly replaced by stress, costly repairs and constant maintenance.

Why Building a New Home is the Smart Move:
Start Fresh, Buy New

Sublime Floor Plan of the Month

The Colette

The Colette Model is known for its beautifully integrated first floor plan that combines the family room with the cutting edge kitchen and dedicated dining areas.

The home is functional and flexible offering the ability to add a second floor bonus room instead of the two story great room as well as moving the laundry room from the first floor to the second floor. Additionally, dependent on the lot, all our plans have the ability to have either a walk out basement or a daylight basement. There are also, three different exterior elevation options available with this home.

The Colette offers tons of living space. It is 4000-4400 sq. ft. with 4 Bedrooms, 4 Bathrooms, full basement and a 3 Car Garage. [To learn more about](#)
